San Jose, CA 95126 | (+1) 631-438-6950 | shahkaran074@gmail.com | the-karanshah.github.io | the-karanshah | the-karanshah

Work Experience

Adobe Inc.

San Jose, CA

SOFTWARE ENGINEER, MACHINE LEARNING

March 2021 - Current

- Working on AI advancements for Document Cloud products in the Document Cloud AI and Innovation Lab
- Responsible for building and upgrading ML pipelines for data generation-processing, model assessment, performance evaluation, etc.
- Implementing ML Operational framework and tools (MLOps) to keep models up-to-date and meeting the quality-standard requirements

Quantiphi

Marlborough, MA

SOFTWARE DEVELOPER INTERN

Sept. 2020 - Dec. 2020

- Built software tools in Python and React.js for Machine Learning Engineers to accelerate production-grade Conversational AI use cases
- Leveraged Flask based routing methods with multiprocessing to trigger underlying capabilities of NVIDIA's end-to-end ML framework and Socket+GRPC for live audio transcription

Simform

Ahmedabad, India

SOFTWARE ENGINEER

June 2018 - April 2019

- Developed an end to end Video Streaming system; allows user to upload and scan the content on the cloud, stream on cross-platform desktop application over globally separated clients; using AWS services (Lambda, S3, Cloudfront, MQTT), Electron.js, and React.js
- Built a software system to semi-automate Company's marketing work with Chrome Extension and REST API Web backend using Python and Node.js, efficient in reducing ~ 40 % of Marketing team's manual work
- Designed and automated ETL jobs to process a huge realtime data using AWS services (Glue, Lambda, S3) and Spark

ISRO - Indian Space Research Organization

Ahmedabad, India

RESEARCH INTERN, MACHINE LEARNING

July 2017 - May 2018

- Designed generalized CNN architecture to handle multimodal and/or multispectral imagery along with adaptability to varying application requirements; trained on Potsdam benchmark dataset producing State of the art results to Semantic Segmentation
- Built software tools in Python for preprocessing of geographic remote sensing data, visualization, real-time performance evaluation, post-processing and output generation as a semi-automation approach
- Manipulated raster GIS data as a part of the pre-processing task using Python and QGIS application

Skills

Programming Python, Javascript, JAVA, C/C++, Matlab

Cloud/Big Data AWS, Google Cloud Platform, MapReduce, Spark

Tools/Technologies REST, Git, Docker, Kubernetes, GRPC

Frameworks/Libraries PyTorch, Tensorflow, Keras, Node.js, Django, Flask, React.js, OpenCV

Education

Stony Brook University

Stony Brook, NY

M.S. IN COMPUTER SCIENCE | GPA : 3.68/4

Aug. 2019 - Dec. 2020

Coursework: Machine Learning, Computer Vision, Data Science, Probability and Statistics, Big Data Analytics, Theory of Database Systems

Gujarat Technological University

Ahmedabad, India

B.E. IN COMPUTER ENGINEERING | GPA : 8.03/10

Aug. 2014 - May 2018

Coursework : Data Structures, Algorithms, Software Engineering, Object Oriented Programming, Distributed Operating System

Projects

Pansharpening Using Convolutional Neural Networks (Python, Keras)

Jan. 2019 - July 2019

- Fine-tuned a Convolutional Neural Network to super-resolve Multispectral Satellite Imagery to Panchromatic Resolution
- Delivered high performance in terms of reduced resolution quantitative assessment and visual inspection
- Achieved **better results** compared to popular methods used for this purpose in the industry

Image Denoising using Deep Neural Networks (Python, Keras)

Oct. 2018 - Dec. 2018

- Designed a Deep Neural Network for Image Denoising and trained-performed on Overhead Images having Gaussian Noise
- Achieved computational efficiency and ability to generalize well despite limited training data
- Used Worldview Imagery samples provided by DigitalGlobe, achieving **90%** accuracy

Retail Sales Data Analysis (Python, Pandas)

Oct. 2019 - Dec. 2019

- Analyzed the market basket dataset to provide sales insight for a chain of retail stores.
- Identified reasons for sales drop with the help of external datasets
- Implemented Word2Vec and LSTM model with k-means clustering to improve Shelf Space Management and Inventory management

Video Action Classification - Recognition (Python, PyTorch, Matlab)

Nov. 2019 - Dec. 2019

- Trained CNN for human action recognition task on the UCF101 data
- Achieved 86% (1st in class) on image test data, and 84% (2nd in class) on video frames test data
- Trained LSTM in RNN to actions classification on data collected by Kinect v2
- Used Transfer Learning to compute features for 60000 video frames with limited compute resources.

Ultrasound Nerve Segmentation (Python, Tensorflow, Keras)

Nov. 2017 - Jan. 2018

- Designed and trained CNN based on U-net to segment a collection of Nerves in Ultrasound Images taken from a Kaggle competition
- Used pre-trained weights of VGG model in the Encoder of the network (transfer learning), gained **68 %** Test Accuracy (Top 100)
